Question 17 English

Antonym of ZEST

- A. Restive
- B. Distaste
- C. Callous
- D. Indifference

No answer is given for this question, and none is taught. No correct option — DEFECTIVE-excluded (decided by assistant under owner's 8 Nov delegation; printed key B "Distaste" is NOT uniquely correct)

A. Means fidgety or restless; not an antonym of zest.

B. The printed key, but not uniquely correct: distaste (dislike, aversion) is the opposite of zest in its "relish / enjoyment" sense, and synonym–antonym lists do give "disgust" as an antonym of zest.

C. Means insensitive or cruel; unrelated to zest.

D. Also a correct antonym: zest means great enthusiasm and energy, and indifference (lack of interest or concern) is its direct opposite in the enthusiasm sense — GrammarHost lists indifference, apathy and lethargy as the opposite of zest. EVIDENCE: standard references split between the two — "disgust/distaste" on one side and "indifference/apathy" on the other — so B and D are both defensible and no single letter can be taught as the answer.
