Question 81 Maths

What is the value of K in terms of X if 3/k+2 = x/4 of K is not equal to O .

- A. None of these
- B. 12-2x/x ✓ **Correct answer**
- C. 12-2x/kx
- D. 12-2/x

A. Wrong: 'None of these' would be right only if the stem were read as 3/k + 2 = x/4 — the unparenthesised reading.

B. Correct: PICK-ONE, decided by assistant under owner's 8 Nov delegation: the stem as printed ('3/k+2 = x/4') is ambiguous — the parentheses are missing. The keyed answer B, (12-2x)/x, is exactly what the standard parenthesised form 3/(k+2) = x/4 gives (k + 2 = 12/x, so k = 12/x - 2 = (12-2x)/x) — this is a well-known SAT-style question, and the test360 rendering lost the parentheses. Assert B (printed key), recording the ambiguity.

C. Wrong: (12-2x)/(kx) is algebraically wrong under either reading.

D. Wrong: 12 - 2/x is algebraically wrong. **Flag:** Stem prints '3/k+2' without parentheses and 'of K is not equal to O' for 'if K is not equal to 0'.
