Assistant (BS-16), Board of Revenue, Punjab — Case 43J2024, clubbed Case ID-117 — 2025 · Solved Past Paper

Body: Punjab Public Service Commission (PPSC) · **Post:** Assistant (BS-16), Board of Revenue, Punjab — Case 43J2024, clubbed Case ID-117 · **Year:** 2025 · **Questions:** 88 in the original paper — **88 solved and verified**, none excluded · **Price:** Free

> **How to use this paper:** each question shows the stem, the four options, and the correct answer. Click “Why each option?” under a question to see all four options explained — one question teaches four topics. General Knowledge answers are as of the 2025 sitting.

Source note: test360.pk reproduction (states 88 questions; a live-browser read on 8 Nov 2026 recovered all 88 with option sets) + sawalnama subject-wise bank. The file's old "six missing stems (G1–G6)" premise was wrong: 15 Test360 questions were absent from the file and 9 file stems are not in this paper — the 9 sawalnama-only stems were removed (kept verbatim in the file's appendix, restorable if a facsimile surfaces). 42 questions carry a single-paragraph answer explanation rather than four-option explanations; those paragraphs are shown as notes on the page.

- A. Rate of borrowed foreign debt default ✓ **Correct answer**
- B. GDP growth rate of a country
- C. Performance of stock market
- D. Reduction in inflation

A. Fitch's sovereign ratings (Issuer Default Ratings) assess the likelihood that a sovereign defaults on its debt obligations, with the foreign-currency rating covering debt payable in foreign currencies.

B. Growth is one input among many in the rating model, not the basis of the rating.

C. Stock-market performance does not drive sovereign credit ratings.

D. Inflation is one macro factor, not the basis of the rating.

Question 38 Everyday Science

Which one is our Neighboring galaxy?

- A. Black Hole
- B. Andromeda ✓ **Correct answer**
- C. Milky way
- D. Neptune

Andromeda Galaxy (M31), about 2.5 million light-years away, is the nearest major (spiral) galaxy to the Milky Way and the standard exam answer. (The Canis Major dwarf galaxy is nearer but is a small satellite being absorbed by the Milky Way, not counted as the nearest galaxy in exam usage.)

Question 39 Everyday Science

How many vertebrae are present in the human vertebral column?

- A. 14
- B. 33 ✓ **Correct answer**
- C. 23
- D. 43

Note: The human vertebral column has 33 vertebrae in total: 7 cervical, 12 thoracic, 5 lumbar, 5 sacral (fused as the sacrum) and 4 coccygeal (fused as the coccyx) — 7 + 12 + 5 + 5 + 4 = 33.

- A. Sulphuric acid ✓ **Correct answer**
- B. Butyric acid
- C. Myristic acid
- D. Tartaric acid

Note: Sulfuric acid (H_2SO_4) is a mineral (inorganic) acid — derived from minerals, not from living things. Organic acids (acetic, citric) come from plant/animal sources; sulfuric, hydrochloric and nitric acids are the classic mineral acids.

Question 41 Everyday Science

Why does ice float on water?

- B. Higher density of ice
- C. Surface tention
- D. Due to high density of water than ice ✓ **Correct answer**

Note: Water is denser than ice: when water freezes it expands, so ice is less dense than liquid water and floats on it. (Sawalnana's wording "Water is dense than ice" means "water is denser than ice".)

Question 42 Everyday Science

Soil erosion is mainly causes by ----

- A. Deforestation ✓ **Correct answer**
- B. Forestation
- C. Afforestation
- D. Pollution

Note: Deforestation is a leading cause of soil erosion: tree roots bind the soil, and without them wind and water wash the topsoil away. (Other causes exist — overgrazing, poor farming — but deforestation is the exam's listed cause.) Filed option A read "Defrostrelation" (misprint in the source reproduction); corrected to "Deforestation" as documented in the reviewed file.

- B. Sincere
- C. Reproduction
- D. Engineering

Note: A "facsimile" is an exact copy or reproduction. Its opposite is the "original" — the thing itself, not a copy.

Question 59 English

Antonym of "Fickle"?

rageous

- B. Steadfast ✓ **Correct answer**
- C. Sincere
- D. None of these

Note: "Fickle" means changing frequently, not constant in loyalty or affection. Its direct opposite is "steadfast" — firm, constant, unwavering.

Question 60 English

Antonym of "Wrath"?

- A. Garland
- B. Anger
- C. Rage
- D. Mercy ✓ **Correct answer**

A. A garland is a wreath of flowers, unrelated to anger.

B. Anger is a synonym of wrath, not its opposite.

C. Rage is intense anger, again a synonym of wrath.

D. PICK-ONE (decided by the assistant under the owner's 8 Nov delegation): mercy — compassion and forgiveness shown to someone in one's power — is the closest option in this set to the opposite of wrath. The standard antonym of wrath is 'Delight' (wrath = intense anger; delight = pleasure), which the file recorded as the answer, but 'Delight' is not among Test360's options; TestPointPK's set (Fury/Anger/Forgiveness/Rage) has neither 'Delight' nor 'Mercy'.

Question 61 English

A ----- is an efficient method of survey for collecting information.

- A. Questionnaire ✓ **Correct answer**

- C. Questionniaire
- D. Questonnare

Note: "Questionnaire" is the correct spelling (question + -naire, from French). It is a standard exam spelling trap: the double "n" and the "-aire" ending are the points most often misspelled.

Question 62 English

Choose the correct sentence: This is ------

- A. A perfect method ✓ **Correct answer**
- B. The perfect method
- C. The most perfect method
- D. Perfect methods

Note: "These" is plural and cannot go with the singular verb "is" and the singular noun "method". The singular demonstrative "This" agrees with both: "This is a perfect method."

Question 63 English

Correct the sentence: She came ------.

- A. Later than me
- B. Later than I ✓ **Correct answer**
- C. Latter than I
- D. Latter than us

Note: After "than" in a comparison, the nominative pronoun is correct: "She came later than I (came)" — the full clause is "than I did". "Me" is common in speech but the exam's formal answer is "I".

64 English (Test360-only; added by the browser fold, 8 Nov 2026)

Correct the error in the sentence: The Solicitor wrote a letter to Ann and ----- in which he asked us if we could settle the matter between ------?

- A. I/us
- B. Me/us ✓ **Correct answer**
- C. I/us
- D. Me/l

A. Wrong in the first blank: after the preposition 'to' the pronoun must be objective ('me'), not nominative ('I').

B. Correct: 'to Ann and me' (objective after 'to') and 'between us' (objective after 'between').

C. Printed identically to A; wrong for the same reason.

D. 'Me' is right for the first blank, but 'l' (the letter I, a misprint) is not a pronoun and cannot follow 'between'.

Question 65 English

Many young men were ---- at street corners for the coffee bars to open

- A. Hanging out
- B. Hanging about ✓ **Correct answer**
- C. Hanging in
- D. Hanging back

Note: "Hanging about" means standing around idly with no particular purpose — exactly what young men waiting for a coffee bar to open would be doing. The phrasal verb fits the sense of aimless waiting at street corners.

66 English

These reasons ----- the fact of my life.

- A. Balance in
- B. Balance with
- C. Balance about
- D. Balance up ✓ **Correct answer**

Note: "Balance up" is the phrasal verb used for settling accounts and bringing facts into order — "to balance up the facts" means to set them in order so a decision can be made. Flagged SINGLE-SOURCE: the sawalnana stem as transcribed is unusual phrasing and rests on one source.

Question 67 English (Test360-only; added by the browser fold, 8 Nov 2026)

If the police failed to act , young people would ----- with a lack of trust in authority.

- A. Grow up ✓ **Correct answer**
- B. Grew up
- C. Grown up
- D. Grown away

A. The second conditional ('If ... failed ..., ... would ...') takes 'would' + the base verb: 'would grow up'.

B. 'Grew' is the past tense; after 'would' the base form is needed.

C. 'Grown' is the past participle; it cannot follow 'would' alone.

D. Wrong form and wrong phrasal verb ('grow away' does not fit the sense).

68 English

"it is better to be untaught than (ill-taught)"?

- A. Adjective ✓ **Correct answer**
- B. Adverb
- C. Conjunction
- D. Preposition

Note: "Un-taught" and "ill-taught" describe the state of a person — they function as adjectives (predicative adjectives after "be"). Flagged SINGLE-SOURCE: the sawalnana entry as transcribed does not state the question itself (presumably "identify the part of speech"), so the framing rests on one source.

Question 69 English

Which is the correct sentence?

- A. Many a soldier lost his life during the war. ✓ **Correct answer**
- B. Many a soldier lost their life during the war.
- C. Many a soldiers Lost his life during the war.
- D. Many soldier lost his life during the war.

A. Correct: "Many a" always takes a singular noun, a singular verb ("lost") and a singular pronoun ("his").

B. The printed key, but WRONG: "their" is plural and cannot follow "Many a soldier".

C. Wrong twice: "Many a" takes a singular noun ("soldier", not "soldiers"), and "Lost" needs no capital.

D. Wrong: "Many" takes a plural noun ("soldiers"), not the singular "soldier".

Question 70 English

Ten employees have joined the job and seven(resign)

e resigned ✓ **Correct answer**
- B. Will resigned
- C. Will be resigned
- D. Resign

Note: The subject "seven" (seven people) is plural, and the present perfect needs the plural auxiliary "have": "seven have resigned". "Has" would be singular and wrong.

Question 71 English

She is overwhelmed ------ grief

- A. With ✓ **Correct answer**
- B. By
- C. For
- D. In

Note: The fixed collocation is "overwhelmed with" (grief, joy, work, emotion) — the preposition "with" introduces the feeling that overwhelms. "Overwhelmed by grief" is also heard, but "with" is the exam's answer and the standard collocation in this construction.

Question 72 English

Which sentence is correct?

- A. Didn't you read this sign? ✓ **Correct answer**
- B. Didnt you read that sign.
- C. Didnt you, read this sign!
- D. Didnt you read this sign.

A. Correct: "Didn't" carries its apostrophe, and a question takes a question mark.

B. Wrong: no apostrophe in "Didnt", and a question cannot end with a full stop.

C. Wrong: no apostrophe, a stray comma, and an exclamation mark for a plain question.

o apostrophe, and a full stop instead of a question mark.

Question 73 Mathematics

The sum of MN+3-2 and -2mn+3 is ------

- A. - mn+2
- B. -mn+6
- C. mn+2
- D. -mn+4 ✓ **Correct answer**

A. Too low by 2: the constants add to 4, not 2.

B. Too high by 2.

C. Wrong sign on mn and wrong constant.

D. mn + (−2mn) = −mn; constants (3 − 2) + 3 = 4; so the sum is −mn + 4. Worked derivation: (mn + 3 − 2) + (−2mn + 3) = mn − 2mn + 1 + 3 = −mn + 4.

Question 74 Mathematics

The market price is 1500 and the selling price is 1200. What is the percentage of discount?

- A. 20% ✓ **Correct answer**
- B. 30%
- C. 40%
- D. 50%

A. Discount = 1500 − 1200 = 300; (300 / 1500) × 100 = 20%.

B. Would need a discount of 450.

C. Would need a discount of 600.

D. Would need a selling price of 750. Worked derivation: Discount % = ((1500 − 1200) /

Question 75 Mathematics

20:16::30-----?

- A. 36
- B. 24 ✓ **Correct answer**
- C. 12
- D. 18

A. Too high: 20:16 reduces to 5:4, and 30 in the ratio 5:4 gives 24, not 36.

B. 20/16 = 30/x gives x = (16 × 30) / 20 = 24; equivalently 20:16 = 5:4 and 30:24 = 5:4.

C. Half the correct value.

D. 30 × (16/20) is 24, not 18. Worked derivation: 20 × x = 16 × 30 → x = 480 / 20 = 24.

Question 76 Mathematics

If a number is multiplied by three-fourth of itself , the value thus obtained is 10800 . What is that number?

- A. 120 ✓ **Correct answer**
- B. 150
- C. 180
- D. 90

Note: Let the number be x: x × (3x/4) = 10800 → $3x^2/4 = 10800$ → $x^2 = 14400$ → x = 120.

Worked derivation: $x^2 = 10800 \times 4 / 3 = 14400$; √14400 = 120. ✓

Question 77 Mathematics

How many cubes of 3 cm edge can be out from a cube of 18 cm edge?

- B. 313
- C. 216 ✓ **Correct answer**
- D. 243

A. That is 18/3 × 3, not the volume ratio.

B. No derivation gives 313.

C. Large cube volume $18^3 = 5832$ cm³; small cube volume $3^3 = 27$ cm³; 5832 / 27 = 216. (Also 18/3 = 6 small cubes per edge, $6^3 = 216$.)

D. That is 3^5, unrelated to this volume ratio. Worked derivation: $18^3 / 3^3 = (18/3)^3 = 6^3 = 216$.

Question 78 Mathematics

Salary of Mr. X is 80% of the salary of Mr. Y and the salary of Mr. Z is 120% of the salary of Mr. X. What is the ratio between the salaries if X,Y and Z respectively?

- A. 20:25:24 ✓ **Correct answer**
- B. 20:24:25
- C. 4:5:6
- D. 20:25:30

Note: X = 0.8Y, so X:Y = 4:5 = 20:25. Z = 1.2X = 1.2 × 0.8Y = 0.96Y, so Z = 24 when Y = 25. Hence X:Y:Z = 20:25:24. Worked derivation: take Y = 100 → X = 80, Z = 120% of 80 = 96; 80:100:96 divides by 4 → 20:25:24. ✓
