Assistant (BS-15), Survey of Pakistan — 2026 · Solved Past Paper

Body: Survey of Pakistan (Survey of Pakistan) · **Post:** Assistant (BS-15), Survey of Pakistan · **Year:** 2026 · **Questions:** 100 in the original paper — **100 solved and verified**, none excluded · **Price:** Free

> **How to use this paper:** each question shows the stem, the four options, and the correct answer. Click “Why each option?” under a question to see all four options explained — one question teaches four topics. General Knowledge answers are as of the 2026 sitting.

Source note: mcq-ai.com past-papers index, "Asked in SOP Assistant 07-07-2026" (accessed 9 Nov 2026; 20 questions, each with 4 options, a marked key and a source explanation). A second full reproduction of the same sitting, testpointpk page 6742, "SOP Assistant Solved Past Paper 07 July 2026", supplied Q21-Q100 and corroborated Q1-Q20. All 20 primary-source printed keys agree with the verified answers; the one genuine key conflict on the second reproduction (Q13 FR) was resolved openly in favour of "Fresh Receipt". The post was advertised by the Survey of Pakistan on 24 May 2026 (Public Notice PID(I) No. 9482/25, last date 21 June 2026); the testing body for this test is not established on the source and is recorded as a caveat, not asserted. This is not FPSC Advertisement 3/2026. Answers verified independently against reference facts, worked derivations and targeted sources, never from the printed key alone.

Question 1 Office Administration

In government offices, 'Classified' documents are those that:

- A. Are publicly available
- B. Delicate data restricted to authorized personnel only ✓ **Correct answer**

out of date

- D. Are filed in alphabetical order

A. Classified documents are the opposite of publicly available; their disclosure is restricted.

B. A classified document holds sensitive information whose unauthorised disclosure could harm national security or public interest, so only cleared personnel with a need to know may see it.

C. Age does not make a document classified; old records may in fact be declassified.

D. Filing order is a separate matter; "classify" here means security grading (Top Secret, Secret, Confidential, Restricted), not sorting.

Question 2 Computer Studies

The term 'Digital Signature' in official documents is used for:

- A. Handwritten signatures scanned
- B. Cryptographic authentication of identity ✓ **Correct answer**
- C. Logo insertion
- D. Email formatting

A. A scanned handwritten signature is just an image; it proves nothing about who signed or whether the document was altered.

B. A digital signature uses public-key cryptography to prove who signed a document, that its content is unchanged, and that the signer cannot deny signing.

C. Inserting a logo has nothing to do with digital signatures.

D. Email formatting is about layout, not about authenticating a signer.

Question 3 Computer Studies

Which of the following is a 'lossy' image compression format?

- B. BMP
- C. TIFF
- D. JPEG ✓ **Correct answer**

A. PNG uses lossless compression: every pixel is preserved exactly.

B. BMP is essentially uncompressed (or losslessly compressed); it is not a lossy format.

C. TIFF is normally lossless (it can store uncompressed or losslessly compressed images).

D. JPEG is the classic lossy format: it discards image detail the eye is unlikely to notice to make files much smaller.

Question 4 Office Administration

In official file tracking, 'Current Number' (C/No.) refers to:

- A. Phone number of officer
- B. Serial number of current file or correspondence ✓ **Correct answer**
- C. Room number
- D. Year of record

A. A current number has nothing to do with a telephone number.

B. Papers placed on a government file are numbered serially, and the current number identifies a particular receipt so notes can refer to it precisely.

C. A room number is a location, not a file-tracking number.

D. The year is not what a current number records.

Question 5 Computer Studies

In MS Excel, the 'IF' function is used to:

- A. Perform conditional logic ✓ **Correct answer**

- C. Sort data
- D. Create charts

A. IF tests a condition and returns one value if it is true and another if it is false, e.g. =IF(B2>=40,"Pass","Fail").

B. Averages are calculated by the AVERAGE function, not IF.

C. Sorting is done by the Sort command, not by IF.

D. Charts are created with Insert Chart, not with IF.

Question 6 Office Administration

A 'Memorandum of Understanding (MoU)' differs from a contract in that it:

- A. Is legally binding
- B. Is usually not legally binding but expresses intent ✓ **Correct answer**
- C. Requires court approval
- D. Is only between private parties

A. An MoU is generally not legally enforceable; that is what distinguishes it from a contract.

B. An MoU records the shared intentions and framework agreed between parties, usually before a formal contract, and is not binding unless it expressly says so and contains the elements of a contract.

C. An MoU does not require court approval.

D. MoUs are commonly signed between government departments and organisations, not only between private parties.

7 Computer Studies

What is 'Two-Factor Authentication (2FA)'?

- A. Two people approving a login
- B. Using two passwords
- C. A second layer of security requiring additional verification beyond a password ✓ **Correct answer**
- D. Logging in twice

A. 2FA does not need a second person; it needs a second factor from the same user.

B. Two passwords are still only one kind of proof (something you know); 2FA needs a different kind of proof.

C. 2FA adds something you have (a phone code, security key) or something you are (a fingerprint) to the password.

D. Logging in twice is not two-factor authentication.

Question 8 Computer Studies

In MS Word, 'Table of Authorities' is used in:

- A. Scientific reports
- B. Legal documents to cite cases and statutes ✓ **Correct answer**
- C. Financial reports
- D. Presentations

A. Scientific reports use a bibliography or reference list, not a Table of Authorities.

B. A Table of Authorities lists the cases, statutes and rules cited in a legal brief, with the pages where each appears.

C. Financial reports use tables of figures, not Tables of Authorities.

D. Presentations do not use Tables of Authorities.

9 Computer Studies

The most secure method of password management is:

- A. Same password everywhere
- B. password manager with unique strong passwords ✓ **Correct answer**
- C. Writing passwords on paper
- D. Using simple memorable passwords

A. Reusing one password lets a single breach open every account (credential stuffing).

B. A reputable password manager keeps a different long, random password for every account, protected by one strong master password.

C. Paper can be lost, copied or seen by anyone nearby.

D. Simple passwords are the easiest for attackers to guess or crack.

Question 10 Computer Studies

In networking, 'VPN' stands for:

- A. Virtual Private Network ✓ **Correct answer**
- B. Very Protected Node
- C. Verified Public Network
- D. Virtual Protocol Node

A. A VPN creates an encrypted tunnel over a public network, letting a device reach a private network securely.

B. "Very Protected Node" is not what VPN stands for.

C. A VPN is private, not public, and this is not the expansion.

D. "Virtual Protocol Node" is not what VPN stands for.

11 Computer Studies

The 'Agile' methodology is used in:

- A. Government budgeting
- B. Software development project management ✓ **Correct answer**
- C. Office filing
- D. HR management

A. Agile is not a budgeting method.

B. Agile manages software projects in short iterations (sprints) that each deliver a working increment, formalised in the Agile Manifesto of 2001.

C. Agile has nothing to do with filing papers.

D. Agile is a project method, not an HR method.

Question 12 Computer Studies

Which MS Office tool would you use to create a professional org chart?

- A. MS Word only
- B. MS Excel only
- C. MS PowerPoint SmartArt or Visio ✓ **Correct answer**
- D. MS Outlook

A. Word also has SmartArt, but the word "only" makes this wrong; PowerPoint's SmartArt and Visio are the proper tools.

B. Excel is a spreadsheet; it is not the tool for drawing organisation charts.

C. SmartArt in PowerPoint (Insert, SmartArt, Hierarchy) gives ready organisation-chart layouts, and Visio is Microsoft's dedicated diagramming program.

D. Outlook is for email and calendars, not for drawing charts.

13 Office Administration

In government file management, 'FR' written on a file stands for:

- A. Final Report
- B. Further Reference
- C. File Register
- D. Fresh Receipt ✓ **Correct answer**

A. "F.R." does not stand for Final Report.

B. "F.R." does not stand for Further Reference.

C. "F.R." does not stand for File Register.

D. Under Pakistan's Secretariat Instructions, F.R. means Fresh Receipt: a new communication placed on a file that has not yet been dealt with.

Question 14 Computer Studies

What does 'PDF/A' format specifically ensure?

- A. Smaller file size
- B. Editable content
- C. Faster printing
- D. Long-term archival preservation of documents ✓ **Correct answer**

A. PDF/A does not aim at smaller files; it embeds fonts, which can make files larger.

B. PDF/A restricts features and is meant for preservation, not editing.

C. PDF/A has nothing to do with print speed.

D. PDF/A (ISO 19005) is the standard for archiving electronic documents so they display identically far into the future.

15 Computer Studies

In MS Excel, 'HLOOKUP' searches for a value in:

- A. A vertical column
- B. A horizontal row ✓ **Correct answer**
- C. A named range
- D. A pivot table

A. Searching down a vertical column is VLOOKUP's job, not HLOOKUP's.

B. HLOOKUP (horizontal lookup) searches for a value in the top row of a table and returns a value from the same column.

C. HLOOKUP works on a table range, not specifically on a named range.

D. HLOOKUP does not search pivot tables.

Question 16 Office Administration

The term 'SOP' in office administration stands for:

- A. Standard Official Procedure
- B. System of Operations
- C. Standard Operating Procedure ✓ **Correct answer**
- D. Scheduled Office Process

A. Close, but the standard term is "Operating", not "Official".

B. "System of Operations" is not what SOP stands for.

C. An SOP is a written step-by-step set of instructions for carrying out a routine task the same way every time.

D. "Scheduled Office Process" is not what SOP stands for.

17 Computer Studies

In MS Word, 'Cross-reference' is used to:

- A. Link to another part of the same document ✓ **Correct answer**
- B. Compare two documents
- C. Translate text
- D. Compare fonts

A. A cross-reference inserts a reference to another item in the same document (a heading, figure, table or footnote), e.g. "see Figure 3 on page 12", and updates automatically.

B. Comparing documents is the Compare feature, not cross-reference.

C. Translation is a separate Review feature, not cross-reference.

D. There is no "compare fonts" function in Word.

Question 18 Office Administration

In official correspondence, 'Demi-Official' letters are written in:

- A. First person with a personal tone ✓ **Correct answer**
- B. Third person formal style
- C. Second person only
- D. Passive voice only

A. A demi-official (D.O.) letter is written between government officers in the first person, in a friendly personal tone, to draw a particular officer's personal attention to a matter.

B. Formal official letters use the third person; D.O. letters deliberately do not.

C. D.O. letters are written in the first person, not the second person only.

D. D.O. letters are personal and direct, not restricted to the passive voice.

19 Computer Studies

What is 'Phishing' in cybersecurity?

- A. A type of computer virus
- B. Duplicitous efforts to steal delicate information by imitating trusted entities ✓ **Correct answer**
- C. A network monitoring tool
- D. A type of firewall

A. Phishing is not a virus; it is a social-engineering trick, though its messages may carry malware.

B. Phishing is a fraud in which criminals impersonate a trusted source (a bank, courier or government office) to trick people into revealing passwords or card details.

C. Network monitoring tools watch traffic; phishing is an attack, not a tool.

D. A firewall blocks traffic; phishing is the attack a firewall cannot stop on its own.

Question 20 Computer Studies

In MS Excel, which function counts only non-empty cells in a range?

- A. COUNT()
- B. COUNTIF()
- C. COUNTBLANK()
- D. COUNTA() ✓ **Correct answer**

A. COUNT counts only cells containing numbers (and dates), not every non-empty cell.

B. COUNTIF counts cells matching a condition, not simply all non-empty cells.

C. COUNTBLANK counts the empty cells — the opposite of what is asked.

D. COUNTA counts all non-empty cells in a range, whatever they contain (numbers, text, dates or errors).

21 General Knowledge

What is the height of K2 (Godwin Austin), second highest mountain of world?

- A. 8,511 meters (27,923 feet)
- B. 8,611 meters (28,251 feet) ✓ **Correct answer**
- C. 8,848 meters (29,029 feet)
- D. None of these

A. Wrong: 8,511 m is not K2's height; no standard source gives this figure.

B. Correct: K2 is 8,611 metres (28,251 feet) above sea level, the world's second-highest mountain after Everest. (Second reproduction testpointpk 6742, position 1 of 100.)

C. Wrong: 8,848 m is Mount Everest's height, not K2's.

D. Wrong: 8,611 m (B) is correct.
