Source note: Primary source: test360.pk reproduction, "Assistant Finance 2020" (accessed 31 Oct 2026; live re-fetch 8 Nov 2026 confirms the page itself jumps 13 → 15, 19 → 21, 35 → 37 — Q14, Q20, Q36 are absent from the only reproduction, and no second reproduction was found). The page states "Total Questions: 101" and shows 98 stems, each with 4 options and a printed key. The printed keys were NOT trusted — every answer was verified from reference facts, worked derivations, and targeted sources, never from the printed key alone. 5 printed keys are corrected openly or not adopted: Q4 (printed A "Seven" — the Council of Common Interests has 8 members under Article 153, so D "None of these"), Q58 (printed B "Onyx" — Carrara, onyx and Calacatta are ALL forms of marble, so D "All of these"), Q73 (printed A "Domain Server is down" — a down mail server IS a bounce cause, so B "State file handle"), Q82 (printed B "101" — 45% of 225 is 101.25, not among the options, so D "None of these"), Q92 (printed C — Rekhta Dictionary glosses the idiom as lonely / alone, so B). 5 questions are DEFECTIVE-excluded by the assistant's decision under the owner's 8 Nov 2026 delegation (37be precedent): Q14, Q20, Q36 (unrecoverable — missing from the only reproduction), Q74 (two valid routes to start PowerPoint), Q101 (two near-synonymous correct glosses). Q87/Q88 are two distinct numbered questions sharing one stem — solved separately, never merged. Dated
